March 19, 2022

To whom it may concern:

This letter serves as a RA/TA progress report for Ahmet Furkan Aydogan for the academic year 2021-2022. Ahmet is working on his degree plan to fulfill the requirements of the Ph.D. degree in Digital and Cyber Forensics.

Ahmet was a TA in my DFSC 5336 Business Continuity Management in Fall 2021. His role in DFSC 5336 was mostly grading the student submissions. In the Spring 2022 semester, he has been serving as TA for my DFSC 4317 Information Security and DFSC 4338 Cyber Warfare courses. In DFSC 4317, Ahmet's role is limited to preparing only one lab material for the class. In DFSC 4338, he assumed the role of class project supervisor. Specifically, Ahmet is leading the efforts for the classroom project focused on IoT security. To this end, he overtook some of the course lectures to teaching materials related to the student's project. Thus, yielding to the experience of teaching a course.

Ahmet is a diligent and very bright student. During this year, he has prepared two journal-style articles that are in the process of completion/submission.

Overall, Ahmet is on track to complete his Ph.D. degree and getting ready to take bigger roles in the next academic year. Please do not hesitate to contact me if you have any questions or if I can be of any further assistance in your evaluation.

Sincerely,

Cihan Varol
Professor
